

Summer Students

2022

Alex Hyndman | 1L
Dalhousie University

(1) If you were not studying to become a lawyer, what career would you have chosen?

Software engineer — I'm still a nerd at heart.

(2) Is there a practice area or industry

in which you are particularly interested?

Commercial litigation, insurance, and corporate law sound especially interesting, but I'm excited to learn about a number of areas and pick people's brains in the office.

(3) What is a random skill that you would like to learn? Moon-walk!

(4) What experience, job or internship have you learned the most from or found most rewarding?

The Charlottetown Chamber of Commerce!

Andrew Sharpe | 2L
Dalhousie University

(1) If you were not studying to become a lawyer, what career would you have chosen?

I would have pursued a career in finance. I am passionate about investing and would've enjoyed a

career in investment management if I hadn't discovered my passion for law.

(2) Is there a practice area or industry in which you are particularly interested?

I have been interested in business since I was young, through various entrepreneurial attempts such as my driveway firewood stand or collecting bottles around the campground we summered. My interest in entrepreneurship eventually led me to a Bachelor of Business degree from the University of Prince Edward Island. Based on this, I am interested in Commercial/Corporate law and Property law.

(3) What is a random skill that you would like to learn?

To learn French. Growing up, many of my friends took French immersion courses, and I continue to regret not taking the program. I would also like to sharpen my pool skills to ensure Michael Rogers does not beat me in a game of pool ever again but work in progress.

(4) What experience, job or internship have you learned the most from or found most rewarding?

Coaching minor hockey. Coaching was a gratifying experience. It allowed me to give back to the Kensington Minor Hockey Association, which has been a massive part of my life growing up. Coaching allowed me the opportunity to develop my leadership and communication skills also.

Kaylee Campbell | 1L
Dalhousie University

(1) If you were not studying to become a lawyer, what career would you have chosen?

Before I considered law, I wanted to be a pharmacist.

(2) Is there a practice area or industry

in which you are particularly interested?

Health law.

(3) What is a random skill that you would like to learn?

A new language!

(4) What experience, job or internship have you learned the most from or found most rewarding?

An internship with Nova Scotia Health. I worked in their Public Health department and was part of a project for reducing youth vaping. It was a great opportunity to work with both policy and community. I also got to meet Chief Public Health Officer, Dr. Theresa Tam, during my placement.

Michael Rogers | 2L
University of New Brunswick

(1) If you were not studying to become a lawyer, what career would you have chosen?

Economist. I have an economics background and considered doing an MA. I like how intersectional economics is

and how it helps us understand market behaviour.

(2) Is there a practice area or industry in which you are particularly interested?

Corporate, Commercial, Tax, Property, and Employment.

(3) What is a random skill that you would like to learn?

Become a Better Golfer so I can:

a) Beat Andrew Sharpe

b) contribute more to our Summer Party Golf Scramble.

(4) What experience, job or internship have you learned the most from or found most rewarding?

My time as a TA (Teaching Assistant) - conducting lectures. It helped with my public speaking skills and with my ability to explain challenging concepts simplistically.
